PROFESSIONAL SUMMARY

Product designer specializing in complex B2B SaaS products, operational platforms, and data-rich workflows. I partner with founders, product teams, and engineers from product strategy through launch, translating ambiguous problems into scalable software. Increasingly, I bring ideas to life through AI-assisted prototyping and functional code.

SKILLS & TOOLS

Product Design: Figma, Framer, Design Systems, Prototyping, Interaction Design

Research & Strategy: User Research, A/B testing, User interviews, User Journey Mapping, Cross-Functional Collaboration, Stakeholder Management.

Design Engineering & AI: Cursor, Figma MCP, Vercel, prompt prototyping with Next.js, HTML/CSS

WORK EXPERIENCE

CBF FLO, USA

Jan 2025 – Aug 2025

FOUNDING PRODUCT DESIGNER

- Defined product strategy with the founder as the first designer, shaping a field-service platform spanning scheduling, CRM, hiring, payroll, and customer management.
- Designed a decision-support scheduling system that surfaced capacity, workload, and job progress, enabling faster, more informed assignment decisions.
- Unified routes, customer history, and property data into a single mobile workflow, reducing context switching for field workers.
- Led user interviews, discovery, rapid prototyping, and product prioritization, shaping the product roadmap alongside founders and engineering.

L&S CREATIVE AGENCY, USA

Sep 2025 – Present

SENIOR PRODUCT DESIGNER

- Designed and shipped conversion-focused marketing websites and digital experiences for Series B SaaS companies including DoorLoop and Daloopa.
- Validated design decisions through A/B testing and stakeholder reviews, aligning user experience with measurable business goals.
- Partnered with engineering through QA to identify and resolve usability issues before launch, improving implementation quality.

DEPLOY STUDIO, MALTA

Mar 2024 – Feb 2026

PRODUCT DESIGN LEAD

Jan 2025 – Feb 2026

- Led design across 10+ products spanning sports, edtech, real estate investment, and vendor management, directing a 2-person team and holding quality consistent across concurrent engagements.
- Built the agency's first shared design system, cutting design turnaround by several days per project by removing foundation work from every new engagement.

PRODUCT DESIGNER

Mar 2024 – Dec 2024

- Designed and shipped products across sports, healthcare, real estate, and education, balancing multiple client products and roadmaps simultaneously.
- Partnered with clients, developers, and PMs to scope and ship features across web and mobile, translating business requirements into interaction models
- Facilitated design reviews and usability validation with clients, translating feedback into iterative product improvements while protecting product direction.

ONARVO, UNITED KINGDOM

Mar 2024 – Mar 2025

DESIGN LEAD

- Led end-to-end product design across care coordination, messaging, front desk, and project management products, establishing design systems that streamlined developer handoffs.
- Designed and shipped an end-to-end care management platform for Carehearted Limited, improving care coordination across 30+ caregivers.
- Designed and built two internal company websites using no-code tools, expanding design delivery beyond static prototypes.

APPLATCH INC, UNITED KINGDOM

Jun 2023 – Aug 2024

PRODUCT DESIGNER

- Joined as founding designer, establishing the product's visual language, interaction patterns, and design system across the platform.
- Designed the app's core learning loop, combining gamified quizzes and screen-time rewards to drive repeat engagement.
- Identified onboarding drop-off points through user feedback and A/B testing, redesigning the registration flow to increase sign-up completion by 40%.
- Designed the product that won the Education and Training category at the UK Startup Awards, and was named a BTA Awards UK finalist in 2025

EDUCATION

B.Sc. Pure and Applied Chemistry (First Class), University of Benin, Nigeria

Completed 2021

LANGUAGES

Native English, Basic French
